

Patent Search & Analytics Services

China IP technical services team

China is the fastest growing market in the world, and Clarivate Analytics has you covered when it comes to delivering local IP search and analytics services in China and across the region.

Our vision is to be largest, most trusted and cost-effective global IP services provider supporting corporations, government organizations, universities and law firms around the world. To live up to this vision, we remain committed to building a global team of experts who bring local knowledge and language capabilities to our market-trusted search solutions.

Our team of experts

With native speaking patent search consultants in Beijing, China, our local team has a broad range of technical and professional experience and education. Most of our consultants are former Examiners with the State Intellectual Property Office of the People's Republic of China and have extensive experience in delivering strategic, technical, and competitive intelligence projects with leading corporations, law firms, government and academic institutions:

- English and Chinese language patent search and examination experience for SIPO
- IP search and analytics experience with commercial IP services providers and as part of a corporate IP office
- Academic backgrounds in computing, telecommunications and/or electrical engineering

- All consultants have B.S. and M.S. degrees from top-tier Chinese or overseas universities
- Access to more than 300+ experienced IP consultants located in major global hubs of intense IP production: USA, Europe, UK, Japan, China, Russia, Australia-New Zealand, supporting corporations, law firms and academic organizations
